

OSTYLE

Winter Collection 2020 / 2021

Dear customers,

We are introducing you the new O'STYLE winter collection for the teams and multi-member groups consisting of winter and softshell sportswear for the ski racers, ski schools, sport's centers' stuff as well as for the athletes who make use of the functional winter sportswear.

The O'STYLE sportswear has been supplied to Czech and foreign customers for many years and our continuous effort is to meet all their requirements. We offer sportswear in children and adults size line, special rates on higher amount orders, individual service, adjustments of the cuts together with the application and print of the logos.

To see our complete collection we invite you to visit our website **www.ostyle.cz**, where you can find thermowear, second layers, fitness apparel, sport accessories and streetwear collection. Further, as the official sales representative we offer ski racing suits of the Slovenian brand Dr. Bobo which meet the FIS standards.

MATERIALS

DERMIZAX DERMIZAX RAIN

- 100 % polyester
- completely waterproof
- windproofness 10 000 g/m²/24 h
- three upper layer material with the revolutionary membrane, made for the extreme conditions
- windproof, breathable, abrasion resistant
- DWR 80/20 TECHNOLOGY

ERICTEX ERICTEX

- 100 % polyester
- water column 20 000 mm H₂O
- windproofness 20 000 g/m²/24 h
- two upper layer material with the membrane, made for the extreme conditions
- highly waterproof and windproof, breathable, abrasion resistant
- DWR TECHNOLOGY
- woven mechanical stretch TECHNOLOGY

O'PROTECT 20 000 / 10 000 PROTECT

- 100 % polyester
- water column 20 000 mm H₂O
- windproofness 10 000 g/m²/24 h
- two upper layer material with the membrane, made for the unfavourable weather conditions
- highly waterproof and windproof, breathable, abrasion resistant
- DWR 80/20 TECHNOLOGY

SOFTSHELL 6N SOFTSHELL 6N

- upper layer: 92 % polyester, 8 % elastane
- inner layer: 100 % polyester microfleece
- water column 14 000 mm H₂O
- windproofness 8 000 g/m²/24 h
- the upper layer material made for the perfect freedom of movement
- waterproof, windproof, breathable, abrasion resistant
- DWR 80/20 TECHNOLOGY

TECHNOLOGY

DWR

- special coating applied on the fabric to improve its waterproofness

The woven mechanical stretch

- innovative knitting technology of the fabric which ensures the stretchability and maintains the functionality of the material without the addition of the elastane
- while material is knitted the connected loops are created and allow the material to stretch during the movement

INSULATIONS

Thermore

- 100 % polyester
- the innovative technology insulation
- offers the consistent thermal coverage over the entire garment
- consists of rolled free-fiber composite and disables the migration of the fibers on the top of the garment
- environment friendly*

Thermore EVOdown EVOdown

- ideal alternative to down feathers and fibers
- high lofting with the luxurious hand feel
- consists of rolled free-fiber composite and disables the migration of the fibers on the top of the garment
- environment friendly: approved by PETA organization

Thermore Classic Thermore

- high lofting with the luxurious hand feel
- 3 thicknesses of the insulation – High Loft (HL) – Compact (C) – Super Compact (SC)
- the best suitable type of the insulation may be chosen for each product
- environment friendly: approved by PETA organization

Hollow fiber

- 100 % polyester
- great insulation
- quick drying fibers with characteristic structure
- soft and high lofting with the pleasant hand feel

* Contains 50 % recycled fibers from PET bottles / every jacket insulated with Classic allows recycling of up to 5 PET bottles / meets the Global Recycle Standard requirements 5
